

## Job Profile

### System Engineer

We are looking for a System Engineer with skills in DataBase Administrator. The resource will monitor the TESISQUARE® applications both as regards the DataBase and across the entire infrastructure, making proposals for improvement of systems and performances.

The resource must interface with various company roles and, with her/his managers, agree on a weekly activity program.

The following technical skills are required:

- Knowledge of Microsoft Sql Server (SQL, TSQL);
- Knowledge of Microsoft Sql Server administration (DBA);
- Good knowledge of Microsoft Windows Server systems;
- Installation and management of the main web servers (Apache, Tomcat, IIS);
- Study and setup of medium / complex infrastructures (load balancing systems, networking, routing);
- Configuration and management of VPN tunneling services;
- Configuration and management of Firewalling systems (iptables, pfsense).

And the following skills are referential elements:

- Systemic knowledge of Linux;
- Configuration of monitoring systems (Nagios);
- Mysql DBA;
- MongoDB DBA;
- .NET framework knowledge;
- Knowledge of devOps and related management tools;
- Knowledge of AWS, GCP (Google Cloud) and Azure platforms.

It is necessary to possess relational skills and an aptitude for interpersonal relationships, analytical and organizational skills, in addition to the orientation to problem solving.

Sporadic transfers to other TESISQUARE® offices may be requested.
